

QUALITY AND ENVIRONMENTAL POLICY

BRAHM PRECISION CORPORATION SPAIN, a Brahm Corporation "BRAHM SPAIN", is a company engaged in metalworking with the aim of meeting our customers' needs by supplying them with "Products with Value".

- **Products with Value** means meeting the "Quality and requirements demanded by Customers".
 - **To achieve this goal, BRAHM SPAIN complies with the following:**
- 1. Set the Objectives:** Before starting the supply of mass-produced products, objectives shall be established and, according to needs, the necessary modifications shall be made. Objectives consistent with the nature and environmental impacts caused by our activities and with this policy shall also be established.
 - 2. Standardize manufacturing processes:** In order to maintain manufacturing with consistent quality, operations are continuously standardized.
 - 3. Establish Quality Control activities:** Quality Control systems shall be standardized to verify their consistent maintenance.
 - 4. Environmental protection, prevention, management and reduction of environmental aspects:** Identify, evaluate and control the environmental aspects of our activities, products and services through optimization of resources. Particular consideration shall be given, where applicable, to energy consumption and greenhouse gas (GHG) emissions, water consumption and discharges, the use of materials, chemicals and hazardous substances, atmospheric emissions, noise, waste, soil protection, biodiversity, and adaptation to and mitigation of the effects of climate change.
 - 5. Sustainable water management:** Optimize water consumption, prevent contamination and control discharges arising from our activities through appropriate treatment of industrial wastewater. BPPPCS shall maintain and control its wastewater treatment plant to remove pollutants derived from the process. In addition, it shall promote saving and efficiency measures, periodic monitoring of consumption and reduction of the water used in processes.
 - 6. Continuous improvement:** Competitive Quality and improvement of environmental performance are the only way to ensure the proper operation and viability of the Company. To this end, and through a correct understanding of the Quality and Environmental Policy, all Personnel shall collaborate in implementing continuous improvements of any kind through full compliance with the procedures established for this purpose.
 - 7. Compliance with requirements:** Ensure that our products comply with customer requirements and with applicable legal and regulatory requirements regarding the environment and the product.
 - 8. Customer satisfaction:** Demonstrate compliance with customer requirements regarding product quality, process effectiveness and logistics, using technologies that are more environmentally friendly and economically viable.
 - 9. Scope and communication of the policy:** Establish the mandatory commitment of all personnel of BRAHM PRECISION CORPORATION SPAIN, a Brahm Corporation, to the Company's Quality and Environmental System in accordance with the requirements of IATF 16949, ISO 9001 and ISO 14001 and, where relevant, of persons and organizations working under its control or influence. Its principles and applicable environmental requirements shall be communicated to contractors, suppliers and other relevant interested parties.

- 10. Measurable environmental objectives and targets:** Establish specific environmental objectives and, where feasible, quantifiable and measurable ones, linked to relevant environmental aspects. Quantitative objectives shall include an indicator, a reference year or value, a target, a deadline or target year, and a responsible person, with periodic monitoring of the degree of achievement.
- 11. Life-cycle perspective and supply chain:** Consider environmental impacts that BRAHM SPAIN can control or influence throughout the life cycle of its products and services, and incorporate environmental criteria into the selection and evaluation of relevant suppliers.
- 12. Responsibilities and participation:** Management shall provide the resources necessary to comply with this Policy. The functions responsible for the Environmental Management System shall coordinate its implementation and monitoring, and managers of the different departments shall integrate applicable environmental requirements into their activities. All personnel shall collaborate in pollution prevention and improvement of environmental performance.
- 13. Monitoring, review and updating:** Environmental performance, commitments and objectives arising from this Policy shall be periodically monitored. The Policy shall be reviewed at planned intervals and when there are relevant changes in the activity, applicable requirements, environmental aspects, interested parties or the context of the organization.
